Frank Romero, "California Dreaming"

The skies are awash in purple and illuminated by the eerie glow of UFOs. Lowriders drive through surreal desert landscapes and open their doors to you. Such is the journey of Frank Romero's new exhibition, "California Dreaming," at contemporary art gallery Luis De Jesus Los Angeles. Exploring California and beyond through the lens of sci-fi dreamscapes, the show depicts familiar Western fixtures of palm trees, cacti, the Chinese Theater and vintage cars, highlighting Mexican-Californian identity and West Coast memories. *Open from Sept. 13 to Oct. 25. luisdejesus.com*
